

## Where are the License Manager Tools?

License Manager Tools can be started from:-

Windows icon>Cadence>LmTools.

This is actually a shortcut to the lmtools.exe in the license manager installation directory, the default location is:

<drive>:\Cadence\LicenseManager (Current installations)

Note: LmTools must be started with the right-click>Run as Administrator (elevated rights) option, otherwise attempting to administer the running license manager service will not be effective.
