

How to Download Software and Licenses for Allegro

How to Download Software and Licenses for Allegro based products.

Log on to <http://support.cadence.com> using your Cadence login account. If you do not have one you can use the Register button to create an account. You MUST use your company email address for the account. You will also need the Cadence License Server Host ID or the Reference Key provided by your software provider.

Once logged in go to Software and select "Download Software" a DOWNLOADS tab will open.

Select the relevant Operating System tab (Windows for example) and then choose the current software version you require. For this example, SPB172, this contains all of the Allegro and OrCAD products

Download the Base Release and any relevant Hotfixes. You can either just get the Download Manager or the full media base release and latest hotfix. If you just choose Download Manager, once installed this can get the full media and any subsequent hotfixes.

How to Download Software and Licenses for Allegro

Once the files are downloaded you will need to order a license file. Close the DOWNLOADS tab and return to the Support Home Page. Then go to Software – Order Licenses (Allegro customers only. If you have OrCAD based products, please contact your Channel Partner).

If prompted select your region (Europe), relevant Host ID, required software version and email address.

[Support Home](#) > [Software](#) > [Order Licenses](#)

Select the releases which you wish to order for any of the License Server Host IDs listed below. Licenses are backward compatible, so if you have an earlier release that is not displayed here, you can select the latest product release. If a Host ID does not appear, please check your [Host IDs](#) or you can ask about your [maintenance contract](#).

In all cases a complete license will be sent to you. The complete license file will include update license keys for the releases selected as well as your current license key for all other releases.
